

Complete Personalized 6-Day Workout Plan

Based on:

- Your current physique goal
- Chest growth priority
- Bigger biceps and forearms
- Belly fat reduction
- Current body fat (~27–29%)
- Previous injury concerns
- Tailbone discomfort during cardio
- Posterior knee discomfort
- Recovery capacity
- Current strength and training experience

This program is designed for:

- Lean muscle growth
- Fat loss/body recomposition
- Recovery balance
- Sustainable progression
- Injury prevention

MAIN GOALS OF THIS PROGRAM

Primary Goals

- Build chest size
- Increase arm and forearm size
- Reduce belly fat
- Improve overall aesthetics
- Maintain recovery and joint health

IMPORTANT TRAINING RULES

Failure Training Rules

Compound Exercises

Stop at 1–2 reps before failure.

Examples:

- Incline DB press

- Leg press
- RDL
- Chest-supported row

Do NOT take heavy compounds to failure regularly.

Isolation Exercises

Final set can safely go to failure.

Examples:

- Cable fly
 - Pec deck
 - Lateral raise
 - Pushdowns
 - Curls
-

Drop Set Rules

Use drop sets only on the final set.

Best exercises for drop sets:

- Cable lateral raise
- Pec deck
- Rope pushdowns
- Cable curls
- Hammer curls
- Leg extension

Do NOT use drop sets on:

- RDL
 - Leg press
 - Heavy DB presses
 - Hip thrusts
-

Superset Rules

Use supersets mainly for isolation exercises and time efficiency.

Avoid supersets on heavy compound lifts.

Rep Ranges

Heavy compound movements

6–10 reps

Hypertrophy movements

10–15 reps

Isolation movements

12–15 reps

Intensity

Train most sets:

- 1–2 reps before failure

Do NOT ego lift.

Rest Time

Heavy exercises

90–120 sec

Isolation exercises

45–75 sec

Weekly Structure

Monday – Push A

Tuesday – Legs + Shoulders A

Wednesday – Pull A

Thursday – Active Recovery/Cardio

Friday – Push B

Saturday – Legs + Pull B

Sunday – Full Rest

MONDAY – PUSH A (Chest Strength Focus)

Recommended Supersets

Superset 1

Cable Fly + Cable Lateral Raise

Superset 2

Rope Pushdown + Overhead Rope Extension

Warm-Up

5 mins light treadmill/cycling

Mobility

- Shoulder rolls × 10
 - Band pull-aparts × 15
 - Wall slides × 10
 - External rotations × 12
-

Workout

1. Incline Dumbbell Press

4 sets × 6–10 reps

Priority chest movement.

2. Flat Dumbbell Press

3 sets × 8–10 reps

Controlled stretch.

3A. Cable Fly (Mid or Low-to-High)

3 sets × 12–15 reps

Slow eccentric.

Perform as superset with Cable Lateral Raise.

3B. Cable Lateral Raises

3 sets × 12–15

Focus side delts.

SUPERSET

4A. Rope Pushdown

3 sets × 12–15

4B. Overhead Rope Extension

3 sets × 12–15

Cardio

15–20 mins incline walk or cycling

Heart rate: 120–140 BPM

Post Workout Stretching

- Doorway Chest Stretch
 - Overhead Tricep Stretch
 - Cross-Body Shoulder Stretch
 - Child's Pose Stretch
-

TUESDAY – LEGS + SHOULDERS A

Warm-Up

5 mins cycling

Dynamic Warm-Up

- Leg swings
 - Bodyweight squats
 - Glute bridges
 - Walking lunges
 - Cat-cow mobility
-

Workout

1. Leg Press OR Hack Squat

4 sets × 8–12

Choose pain-free option.

2. Seated Leg Curl

3 sets × 10–12

3. Leg Extension

3 sets × 12–15

Controlled reps.

4. Machine Shoulder Press

3 sets × 8–10

Shoulder-safe pressing.

6. Standing Calf Raise

3 sets × 12–15

9. Seated Calf Raise

2–3 sets × 12–15

Improves calf training frequency to 2x/week.

Core

Dead Bug

2 sets

Pallof Press

2 sets

Cardio

Very light only: 5–10 mins easy cycling OR skip.

NO intense incline treadmill.

Stretching

- Seated Hamstring Stretch
 - Standing Quad Stretch
 - Kneeling Hip Flexor Stretch
 - Figure-4 Glute Stretch
 - Wall Calf Stretch
-

WEDNESDAY – PULL A (Back Width + Biceps)

Recommended Supersets

Superset 1

Face Pulls + Hammer Curls

Superset 2

Incline DB Curl + Reverse Curl

Warm-Up

5 mins rowing or cycling

Mobility

- Scapular pulldown × 12
 - Band rows × 15
 - Cat-cow × 10
 - Dead hang 15 sec
-

Workout

1. Lat Pulldown

4 sets × 8–12

2. Chest-Supported Row

3 sets × 8–12

Lower-back friendly.

3A. Face Pulls

3 sets × 12–15

Perform as superset with Hammer Curl.

3B. Hammer Curl

3 sets × 10–12

Forearm + brachialis focus.

4A. Incline Dumbbell Curl

3 sets × 10–12

Deep stretch.

4B. Reverse Curl

2–3 sets × 12–15

Perform as superset with Incline Dumbbell Curl.

Forearm thickness.

Cardio

15–20 mins cycling or incline walk

Moderate intensity only.

Stretching

- Kneeling Lat Prayer Stretch
- Wall Bicep Stretch
- Wrist Flexor Forearm Stretch
- Seated Hamstring Stretch
- Child's Pose Stretch

THURSDAY – ACTIVE RECOVERY

No heavy lifting.

Recovery Work

20–30 mins easy walking

OR

Easy cycling

Mobility Routine

Seated Hamstring Stretch

30 sec each side

Kneeling Hip Flexor Stretch

30 sec each side

Figure-4 Glute Stretch

30 sec each side

Wall Calf Stretch

30 sec each side

Cat-Cow

10 reps

Child's Pose Stretch

45 sec

Open Book Thoracic Rotations

10 each side

FRIDAY – PUSH B (Chest Hypertrophy Focus)

Recommended Supersets

Superset 1

Pec Deck + Cable Lateral Raise

Superset 2

V-Bar Pushdown + Overhead Cable Extension

Warm-Up

Same as Push A.

Workout

1. Incline Machine Press

4 sets × 8–12

2. Chest Press Machine

3 sets × 10–12

3. Flat Dumbbell Press

2–3 sets × 8–10

Controlled stretch and additional chest overload.

4A. Pec Deck

3 sets × 12–15

Controlled squeeze.

Perform as superset with Cable Lateral Raise.

4B. Cable Lateral Raise

3 sets × 12–15

SUPERSET

5A. V-Bar Pushdown

3 sets × 12–15

5B. Overhead Cable Extension

3 sets × 12–15

5. Cable Lateral Raise

3 sets × 12–15

Cardio

15–20 mins moderate cardio.

Cycling preferred.

Stretching

- Doorway Chest Stretch
 - Cross-Body Shoulder Stretch
 - Overhead Tricep Stretch
-

SATURDAY – LEGS + PULL B

Recommended Supersets

Superset 1

Rear Delt Cable Fly + Spider Curl

Superset 2

Cable Hammer Curl + Seated Calf Raise

Warm-Up

5 mins cycling

Dynamic mobility

- Glute bridges
 - Leg swings
 - Bodyweight squats
 - Hip mobility
-

Workout

1. Romanian Deadlift (RDL)

3 sets × 8–10

Controlled form.

2. Hip Thrust

3 sets × 10–12

3. Bulgarian Split Squat

2–3 sets × 10 each leg

Replace with leg press if discomfort.

4. Seated Cable Row

3 sets × 10–12

Extra upper/mid-back work for improved weekly frequency and posture support.

5. Rear Delt Cable Fly

3 sets × 12–15

6. Spider Curl

3 sets × 10–12

7. Incline Dumbbell Curl

2 sets × 10–12

Stretch-focused bicep work for fuller long-head development.

8. Cable Hammer Curl

2–3 sets × 12

Core

Hanging Knee Raise

2–3 sets

Cable Crunch

2–3 sets

Cardio

Optional: 5–10 mins easy walk only.

NO intense cardio.

Stretching

- Seated Hamstring Stretch
- Figure-4 Glute Stretch
- Kneeling Hip Flexor Stretch
- Child's Pose Stretch
- Wall Calf Stretch

SUNDAY – FULL REST

Focus On

- Recovery
- Mobility
- Hydration
- Sleep
- Meal preparation

Optional:

- Easy walking
- Light stretching

PROGRESSIVE OVERLOAD RULES

Very important for chest and arm growth.

Progression Method

Example:

Week 1: 15kg DB × 8 reps

Week 2: 15kg DB × 10 reps

Week 3: 17.5kg × 8 reps

Small progression over time builds muscle.

IMPORTANT RECOVERY GUIDELINES

Keep workouts:

75–100 mins max

Deload Every 6–8 Weeks

Reduce:

- weight
- sets
- intensity

for 1 week.

NUTRITION TARGETS

Calories

Approx: 1900–2200 kcal

Adjust based on progress.

Protein

120–140g/day

Very important.

Water

3–4 liters daily minimum.

More if sweating heavily.

CARDIO RULES FOR YOU

Best options

- cycling
 - incline walk (moderate)
 - elliptical
-

Avoid

- excessive HIIT
 - long stairmaster sessions
 - intense incline treadmill after leg day
-

WARNING SIGNS

Reduce volume if:

- sharp pain
 - worsening knee pain
 - severe tailbone pain
 - strength drops continuously
 - fatigue becomes excessive
 - sleep worsens badly
-

EXPECTED RESULTS TIMELINE

8–12 weeks

- better chest fullness
 - slight waist reduction
 - improved arm size
 - better stamina
-

4–6 months

- noticeable physique transformation
 - reduced belly fat
 - better shoulder/chest separation
 - stronger arms/forearms
-

6–10 months

Possible:

- body fat near 15–17%
 - strong aesthetic improvement
 - much leaner waist
 - visible muscularity
-

FINAL NOTES

This plan is specifically optimized for:

- body recomposition
- hypertrophy
- injury management
- sustainable recovery
- chest and arm emphasis
- fat loss

The most important factor now is: CONSISTENCY over many months.
