

6-DAY WORKOUT PLAN

Push / Pull / Legs | Chest & Arm Focus

Detail	Value
Body Fat	~27-29%
Primary Goal	Build chest size + Increase arm/forearm size
Secondary Goal	Reduce belly fat + Improve aesthetics
Concerns	Tailbone discomfort (cardio), Posterior knee discomfort
Focus	Body recomposition + Hypertrophy
Equipment	Full Gym
Schedule	Mon-Sat (Thu Active Recovery, Sun Full Rest)

Injury-aware | Sustainable progression | Every exercise has an alternate

IMPORTANT TRAINING RULES

Failure Training Rules

- Compound exercises: Stop at 1-2 reps before failure (Incline DB press, Leg press, RDL, Chest-supported row)
- Isolation exercises: Final set can safely go to failure (Cable fly, Pec deck, Lateral raise, Pushdowns, Curls)

Drop Set Rules

- Use drop sets ONLY on the final set
- Best for: Cable lateral raise, Pec deck, Rope pushdowns, Cable curls, Hammer curls, Leg extension
- Do NOT drop set: RDL, Leg press, Heavy DB presses, Hip thrusts

Superset Rules

- Use supersets mainly for isolation exercises and time efficiency
- Avoid supersets on heavy compound lifts

Injury Awareness

- Tailbone: Avoid excessive stairmaster / intense incline treadmill after leg day
- Tailbone: Cycling and moderate incline walking are preferred cardio options
- Posterior knee: Choose pain-free leg press/hack squat option
- Posterior knee: Replace Bulgarian split squat with leg press if discomfort
- General: Do NOT ego lift. Train most sets 1-2 reps before failure

WEEKLY OVERVIEW

Day	Focus	Type	Time
Monday	Push A (Chest Strength)	Strength	~75 min
Tuesday	Legs + Shoulders A	Hypertrophy	~80 min
Wednesday	Pull A (Back + Biceps)	Strength	~75 min
Thursday	Active Recovery	Mobility	~30 min
Friday	Push B (Chest Hypertrophy)	Volume	~75 min
Saturday	Legs + Pull B	Hypertrophy	~80 min
Sunday	FULL REST	-	-

Rep Range Guide

Exercise Type	Rep Range	Rest Time
Heavy compound	6-10 reps	90-120 sec
Hypertrophy	10-15 reps	60-90 sec
Isolation	12-15 reps	45-75 sec

HOW TO READ EACH EXERCISE CARD

Element	What It Means
Sets x Reps	e.g. 4 x 6-10 = 4 sets of 6-10 reps
Rest	How long to rest between sets

RIR	Reps In Reserve = how many reps you could still do. RIR 2 = stop 2 reps before failure
Alt	Alternate exercise you can swap in (same muscle, different movement)

Intensity Technique Tags

DROP Drop Set = on last set, reduce weight 30-40% and immediately do more reps (no rest)

FAILURE Go to Failure = on last set, keep going until you can't do another rep with good form

SUPERSET Superset = do both exercises back-to-back with no rest between them

MONDAY - Push A (Chest Strength Focus)

Warm-Up (8-10 min)

#	Exercise	Duration / Reps	Image
1	Light treadmill walk or cycling	5 min	
2	Shoulder rolls	10 reps	
3	Band pull-aparts	15 reps	
4	Wall slides (scapular activation)	10 reps	
5	External rotations (light band/DB)	12 reps each	

Chest + Shoulders (2 exercises + 1 superset)

1

Incline Dumbbell Press

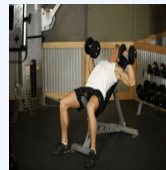

4 x 6-10

Rest: 90-120s

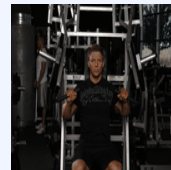

RIR: 1-2

Alt: Incline Machine Press

Priority chest movement. Controlled eccentric.

Primary

Alternate

2

Flat Dumbbell Press

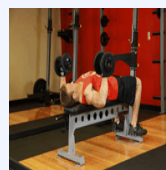

3 x 8-10

Rest: 90s

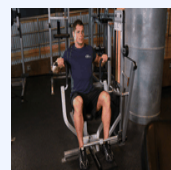

RIR: 1-2

Alt: Chest Press Machine

Controlled stretch at bottom.

Primary

Alternate

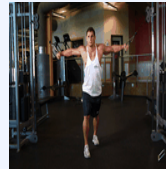

SUPERSET

3A Cable Fly (Mid/Low-to-High)**3 x 12-15**

Rest: 60s

RIR: 2*Alt: Pec Deck**Slow eccentric. Squeeze at peak contraction.*

SUPERSET

Primary

Alternate

3B Cable Lateral Raise**3 x 12-15**

Rest: 60s

RIR: 1-2*Alt: DB Lateral Raise**Focus on side delts. Light weight, strict form.*

SUPERSET

Primary

Alternate

Triceps (2 exercises - Superset)

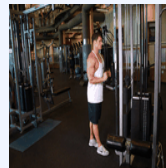

SUPERSET

4A Rope Pushdown**3 x 12-15**

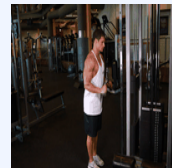

Rest: 60s

RIR: 1-2*Alt: V-Bar Pushdown**Elbows pinned. Full extension.*

SUPERSET

Primary

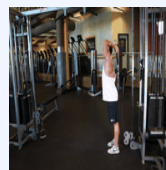

Alternate

4B Overhead Rope Extension**3 x 12-15**

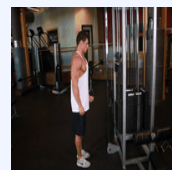

Rest: 60s

RIR: 1-2*Alt: Single-Arm Cable Pushdown**Long head stretch. Controlled movement.*

SUPERSET

Primary

Alternate

Cardio (15-20 min)

Exercise	Duration	Notes
Incline treadmill walk or cycling	15-20 min	HR target: 120-140 BPM

Stretching

#	Exercise	Duration	Image
---	----------	----------	-------

1	Doorway chest stretch	30s each side	
2	Overhead tricep stretch	30s each side	
3	Cross-body shoulder stretch	30s each side	
4	Child's pose stretch	45s	

TUESDAY - Legs + Shoulders A

Warm-Up (8-10 min)

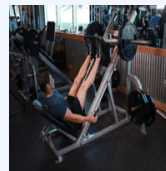

#	Exercise	Duration / Reps	Image
1	Cycling (easy pace)	5 min	
2	Leg swings (front-back + side-side)	10 each leg	
3	Bodyweight squats	15 reps	
4	Glute bridges	15 reps	
5	Walking lunges (bodyweight)	10 each leg	
6	Cat-cow mobility	10 reps	

Legs (3 exercises)

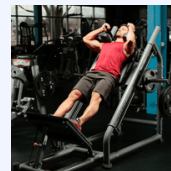

1

Leg Press

4 x 8-12

Rest: 90-120s **RIR: 1-2***Alt: Hack Squat**Choose pain-free option for knee. Depth over weight.*

Primary

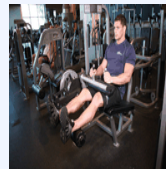

Alternate

2

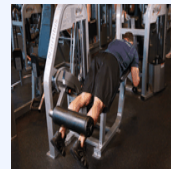

Seated Leg Curl

3 x 10-12

Rest: 60s

RIR: 1-2*Alt: Lying Leg Curl**Controlled tempo. Full ROM.*

Primary

Alternate

3

Leg Extension**3 x 12-15**

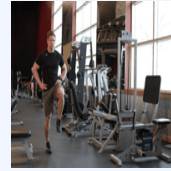

Rest: 60s

RIR: 1

DROP

*Alt: Walking Lunges**Last set drop set. Controlled reps, squeeze at top.*

Primary

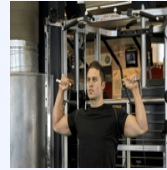

Alternate

Shoulders (1 exercise)

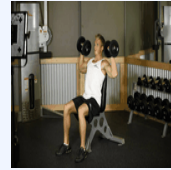

4

Machine Shoulder Press**3 x 8-10**

Rest: 90s

RIR: 1-2*Alt: Seated DB Press**Shoulder-safe pressing. No barbell overhead.*

Primary

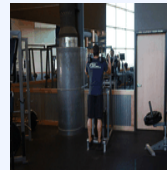

Alternate

Calves (2 exercises)

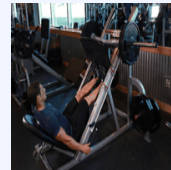

5

Standing Calf Raise**3 x 12-15**

Rest: 45s

RIR: 1-2*Alt: Leg Press Calf Raise**Full stretch at bottom, pause at top.*

Primary

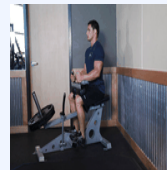

Alternate

6

Seated Calf Raise**2-3 x 12-15**

Rest: 45s

RIR: 1-2*Alt: DB Standing Calf Raise**Targets soleus. 2x/week calf frequency.*

Primary

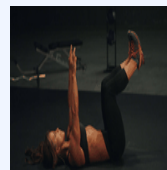

Alternate

Core (2 exercises)

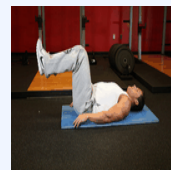

7

Dead Bug**2 x 10 each side**

Rest: 45s

RIR: 2*Alt: Reverse Crunch**Deep core activation. No spinal stress.*

Primary

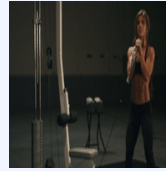

Alternate

8

Pallof Press**2 x 10 each side**

Rest: 45s

RIR: 2*Alt: Banded Pallof Press**Anti-rotation. Builds core stability.*

Primary

Alternate

Cardio (5-10 min)

Exercise	Duration	Notes
Easy cycling (or skip)	5-10 min	Very light only. NO intense incline treadmill.

Stretching

#	Exercise	Duration	Image
1	Seated hamstring stretch	30s each side	
2	Standing quad stretch	30s each side	
3	Kneeling hip flexor stretch	30s each side	
4	Figure-4 glute stretch	30s each side	
5	Wall calf stretch	30s each side	

WEDNESDAY - Pull A (Back Width + Biceps)

Warm-Up (8-10 min)

#	Exercise	Duration / Reps	Image
1	Rowing machine or cycling	5 min	
2	Scapular pulldown	12 reps	
3	Band rows	15 reps	
4	Cat-cow	10 reps	
5	Dead hang	15 sec	

Back (2 exercises)

1

Lat Pulldown

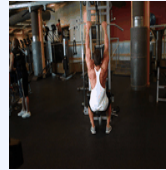

4 x 8-12

Rest: 90s

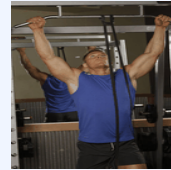

RIR: 1-2

Alt: Assisted Pull-Up

Squeeze shoulder blades. Full stretch at top.

Primary

Alternate

2

Chest-Supported Row

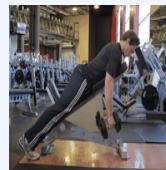

3 x 8-12

Rest: 90s

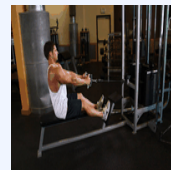

RIR: 1-2

Alt: Seated Cable Row

Lower-back friendly. Pull to lower chest.

Primary

Alternate

Back + Biceps (2 supersets)

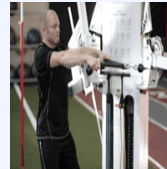

SUPERSET

3A Face Pulls**3 x 12-15**

Rest: 60s

RIR: 2*Alt: Reverse Pec Deck**Pull to forehead. Great for posture + rear delts.*

SUPERSET

Primary

Alternate

3B Hammer Curl**3 x 10-12**

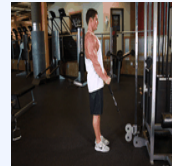

Rest: 60s

RIR: 1-2*Alt: Cable Hammer Curl**Forearm + brachialis focus. No swinging.*

SUPERSET

Primary

Alternate

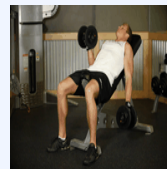

SUPERSET

4A Incline Dumbbell Curl**3 x 10-12**

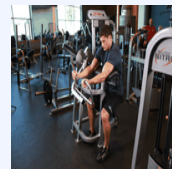

Rest: 60s

RIR: 1-2*Alt: Machine Preacher Curl**Deep stretch. Light weight.*

SUPERSET

Primary

Alternate

4B Reverse Curl**2-3 x 12-15**

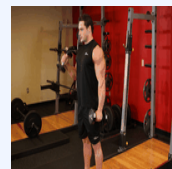

Rest: 60s

RIR: 2*Alt: DB Hammer Curl**Forearm thickness. Strict form.*

SUPERSET

Primary

Alternate

Cardio (15-20 min)

Exercise	Duration	Notes
Cycling or incline treadmill walk	15-20 min	Moderate intensity only.

Stretching

#	Exercise	Duration	Image
1	Kneeling lat prayer stretch	30s	

2	Wall bicep stretch	30s each side	
3	Wrist flexor/forearm stretch	20s each	
4	Seated hamstring stretch	30s each side	
5	Child's pose stretch	45s	

THURSDAY - Active Recovery

Recovery Work

- 20-30 minutes easy walking OR easy cycling
- No heavy lifting
- Focus on recovery, mobility, and flexibility

Mobility Routine

#	Exercise	Duration
1	Seated hamstring stretch	30 sec each side
2	Kneeling hip flexor stretch	30 sec each side
3	Figure-4 glute stretch	30 sec each side
4	Wall calf stretch	30 sec each side
5	Cat-cow	10 reps
6	Child's pose stretch	45 sec
7	Open book thoracic rotations	10 each side

Key Reminders

- This day is essential for recovery and muscle growth
- Keep heart rate low - this is NOT a cardio day
- Hydrate well - 3+ liters of water
- Prioritize sleep (7-8 hours)
- Meal prep for the rest of the week

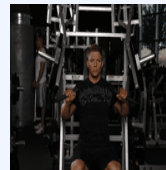

FRIDAY - Push B (Chest Hypertrophy Focus)

Warm-Up (8-10 min)

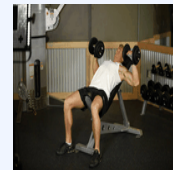

#	Exercise	Duration / Reps	Image
1	Light treadmill walk or cycling	5 min	
2	Shoulder rolls	10 reps	
3	Band pull-aparts	15 reps	
4	Wall slides (scapular activation)	10 reps	
5	External rotations (light band/DB)	12 reps each	

Chest (3 exercises + 1 superset)

- 1 Incline Machine Press**
4 x 8-12 Rest: 90s **RIR: 1-2**
Alt: Incline Dumbbell Press
Machine for stability. Focus on squeeze.

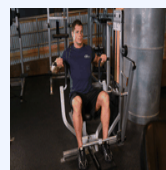

Primary

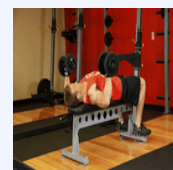

Alternate

- 2 Chest Press Machine**
3 x 10-12 Rest: 60s **RIR: 2**
Alt: Flat Dumbbell Press
Controlled reps. Mind-muscle connection.

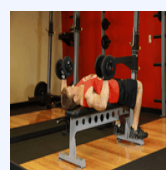

Primary

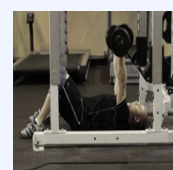

Alternate

- 3 Flat Dumbbell Press**
2-3 x 8-10 Rest: 60s **RIR: 1-2**
Alt: DB Floor Press
Additional chest overload. Controlled stretch.

Primary

Alternate

SUPERSET

4A Pec Deck

3 x 12-15

Rest: 60s

RIR: 1

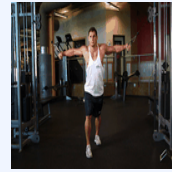

Alt: Cable Fly (Mid/Low-to-High)

Controlled squeeze.

SUPERSET

Primary

Alternate

4B Cable Lateral Raise

3 x 12-15

Rest: 60s

RIR: 1-2

Alt: DB Lateral Raise

Side delt isolation.

SUPERSET

Primary

Alternate

Triceps (2 exercises - Superset)

SUPERSET

5A V-Bar Pushdown

3 x 12-15

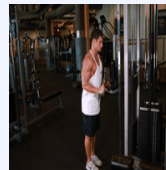

Rest: 60s

RIR: 1-2

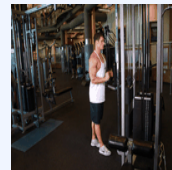

Alt: Rope Pushdown

Focus on contraction. Full lockout.

SUPERSET

Primary

Alternate

5B Overhead Cable Extension

3 x 12-15

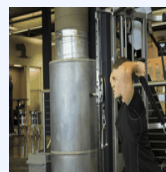

Rest: 60s

RIR: 1-2

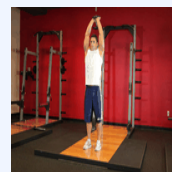

Alt: DB Overhead Extension

Long head stretch. Controlled.

SUPERSET

Primary

Alternate

Cardio (15-20 min)

Exercise	Duration	Notes
Moderate cycling (preferred)	15-20 min	Cycling preferred over treadmill.

Stretching

#	Exercise	Duration	Image
---	----------	----------	-------

1	Doorway chest stretch	30s each side	
2	Cross-body shoulder stretch	30s each side	
3	Overhead tricep stretch	30s each side	

SATURDAY - Legs + Pull B

Warm-Up (8-10 min)

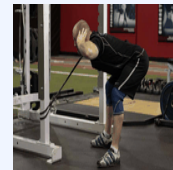

#	Exercise	Duration / Reps	Image
1	Cycling (easy pace)	5 min	
2	Glute bridges	15 reps	
3	Leg swings (front-back)	10 each leg	
4	Bodyweight squats	15 reps	
5	Hip mobility circles	10 each direction	

Legs - Posterior Chain (3 exercises)

- 1** **Romanian Deadlift (RDL)**
3 x 8-10 Rest: 90-120s **RIR: 1-2**
Alt: Cable Pull-Through
Controlled form. Hinge at hips. Do NOT go to failure.

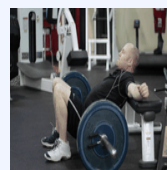

Primary

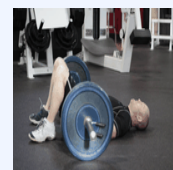

Alternate

- 2** **Hip Thrust**
3 x 10-12 Rest: 90s **RIR: 1-2**
Alt: Glute Bridge
Pad the bar. Full glute squeeze at top.

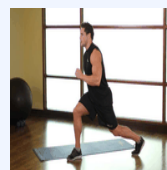

Primary

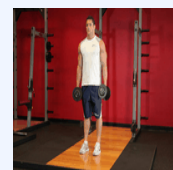

Alternate

- 3** **Bulgarian Split Squat**
2-3 x 10 each Rest: 60s **RIR: 2**
Alt: Reverse Lunge
Replace with leg press if knee discomfort.

Primary

Alternate

Back (1 exercise)

4

Seated Cable Row

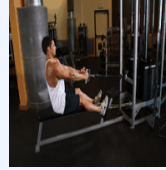

3 x 10-12

Rest: 60s

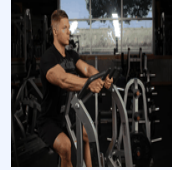

RIR: 1-2

Alt: Machine Row

Extra upper/mid-back work for posture support.

Primary

Alternate

Back + Biceps (Superset)

SUPERSET

5A

Rear Delt Cable Fly

3 x 12-15

Rest: 60s

RIR: 2

Alt: Seated Rear Delt Raise

Rear delt + posture. Light weight.

SUPERSET

Primary

Alternate

5B

Spider Curl

3 x 10-12

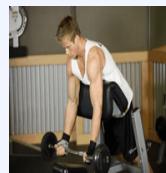

Rest: 60s

RIR: 1-2

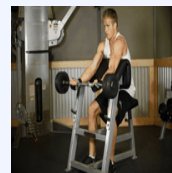

Alt: Preacher Curl Machine

Strict form, no momentum.

SUPERSET

Primary

Alternate

Biceps (1 exercise)

6

Incline Dumbbell Curl

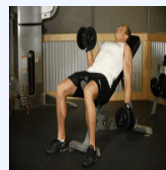

2 x 10-12

Rest: 60s

RIR: 2

Alt: Concentration Curl

Stretch-focused. Fuller long-head development.

Primary

Alternate

Biceps + Calves (Superset)

SUPERSET

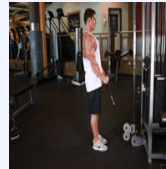

7A

Cable Hammer Curl**2-3 x 12**

Rest: 60s

RIR: 1-2*Alt: DB Cross-Body Hammer Curl**Forearm + brachialis focus.*

SUPERSET

Primary

Alternate

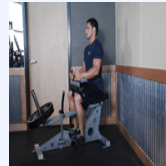

7B

Seated Calf Raise**2-3 x 12-15**

Rest: 45s

RIR: 1-2*Alt: DB Standing Calf Raise**Targets soleus. Paired for time efficiency.*

SUPERSET

Primary

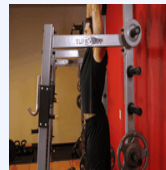

Alternate

Core (2 exercises)

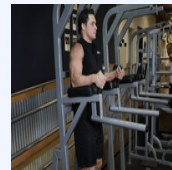

8

Hanging Knee Raise**2-3 x 10**

Rest: 45s

RIR: 2*Alt: Captain's Chair Knee Raise**Controlled - no swinging.*

Primary

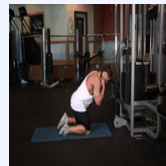

Alternate

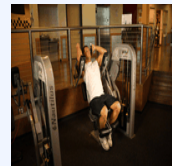

9

Cable Crunch**2-3 x 12-15**

Rest: 45s

RIR: 2*Alt: Ab Crunch Machine**Squeeze at bottom. Upper abs focus.*

Primary

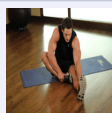

Alternate

Cardio (5-10 min)

Exercise	Duration	Notes
Easy walk only (optional)	5-10 min	NO intense cardio. Recovery priority.

Stretching

#	Exercise	Duration	Image
1	Seated hamstring stretch	30s each side	

2	Figure-4 glute stretch	30s each side	
3	Kneeling hip flexor stretch	30s each side	
4	Child's pose stretch	45s	
5	Wall calf stretch	30s each side	

SUNDAY - Full Rest

- Focus on recovery, mobility, hydration, and sleep
- Optional: Easy walking or light stretching
- Meal preparation for the week ahead
- Hydrate - 3-4 liters of water
- Sleep - aim for 7-8 hours
- No gym work

PROGRESSIVE OVERLOAD RULES

- Very important for chest and arm growth

Phase	What to Do
Week 1	e.g. 15kg DB x 8 reps - Learn movements, focus on form
Week 2	e.g. 15kg DB x 10 reps - Add reps with same weight
Week 3	e.g. 17.5kg DB x 8 reps - Increase weight, reset reps
Ongoing	Small progression over time builds muscle. Patience is key.
Every 6-8 wks	Deload week - reduce weight, sets, and intensity for 1 week

NUTRITION TARGETS

Macro	Daily Target	Notes
Calories	1,900-2,200 kcal	Adjust based on progress
Protein	120-140g/day	Very important for muscle growth (~2g/kg)
Water	3-4 liters	More if sweating heavily

CARDIO RULES

Best Options	Avoid
Cycling	Excessive HIIT
Incline walk (moderate)	Long stairmaster sessions
Elliptical	Intense incline treadmill after leg day

WARNING SIGNS - Reduce Volume If:

Warning Sign	Action
Sharp pain	Stop immediately - switch to alternate
Worsening knee pain	Switch to pain-free variant or skip
Severe tailbone pain	Change cardio modality (try cycling)
Strength drops continuously	Consider deload or extra rest day
Fatigue becomes excessive	Reduce volume/intensity, check sleep
Sleep worsens badly	Scale back training, prioritize recovery

EXPECTED RESULTS TIMELINE

Timeline	Expected Changes
8-12 weeks	Better chest fullness, slight waist reduction, improved arm size, better stamina
4-6 months	Noticeable physique transformation, reduced belly fat, better shoulder/chest separation
6-10 months	Body fat near 15-17%, strong aesthetic improvement, leaner waist, visible muscularity
